SAILY WIDGET INSTRUCTIONS - How to insert a widget

SUMMARY:

Drop our banner on your site in two steps:

1. Include the tiny auto-height script (once per page)
2. Add the iframe where you want the banner.

INSTRUCTIONS:

1. Include the auto-height script (once per page)

```
<!-- Put in <head> or before the closing </body> -->
<script src="https://saily.com/embed/receiver.js" async></script>
```

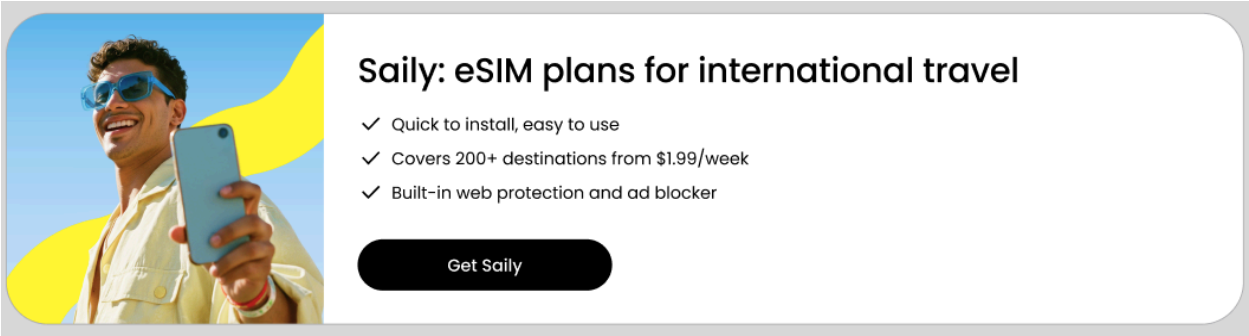
2. Paste the iframe where you want the banner

Choose variant: a or b

variant A

```
<iframe
src="https://saily.com/embed/affiliate-banner?variant=a&cta=https://www.saily.com/affiliate&aff_banner=partner123>"
 style="display: block; width: 100%; border: 0; overflow: hidden"
 referrerpolicy="no-referrer"
 loading="lazy"
></iframe>
```

You should get this widget

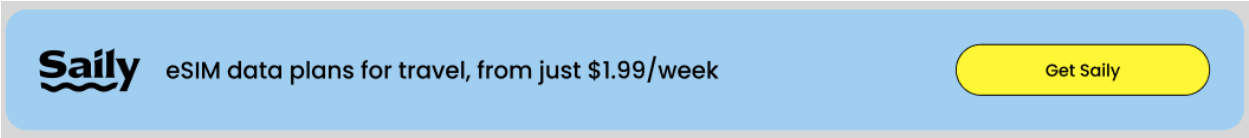


variant B

```
<iframe

src="https://saily.com/embed/affiliate-banner?variant=b&cta=https://www.saily.com/affiliate&aff_banner=partner123>"
 style="display: block; width: 100%; border: 0; overflow: hidden"
 referrerpolicy="no-referrer"
 loading="lazy"
></iframe>
```

You should get this widget



That's it. The banner will resize itself to the exact height of its content.

ADDITIONAL INFORMATION

Query parameters

Src attribute must contain these query parameters:

- `variant`: Which layout to show.
  - `a` or `b`
- `cta`: Absolute URL for the CTA button. **URL-encoding this value is recommended.**
  Example: `https://www.saily.com/affiliate`
- `aff_banner`: Your partner/affiliate identifier.
  Example: `partner123`

That's it. The banner will resize itself to the exact height of its content.

Multiple banners on one page

You can place multiple iframes; the script will auto-size each one independently. (edited)
